

SUNPITCH

SUNPITCH is a folding arm awning on 40x40 mm powder coated steel square bar with stainless steel chain arms.

The unique gear rack extruded arm support allows the awning to be easily tilted to any angle. This feature allows for better sun protection and rain dispersal.

Maximum recommended dimensions are 600 cm width and 360 cm projection on a Ø 70 mm roller tube with a single pair of arms.

A protection hood in extruded aluminum, a special bracket for under-roof mounting and a center support are also available.

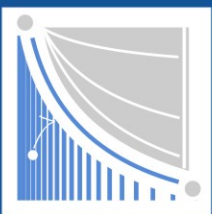

Frame colours are white, ivory or grey.
